

How to run the CDR Extractor and CDR Migration tools for Singer

Step 1: Extracting Json files from Freeswitch server

Freeswtich Server IP:	172.16.11.131 (port: 65)
Username:	root
Password:	Duo\$@2016

Part I

- Go to /opt/tools/
 - `cd /opt/tools`
- Open getJsons.sh file
 - `vi getJsons.sh`
- Enter a file name where the Jsons should be saved to.
 - Path is `/tmp/chathuranga/$FILENAME$`
- Enter the date with start time and end time.
- Save and close the getJsons.sh file
- Execute the file using the below command.
 - `./getJsons.sh`

Part II

- Go to /tmp/chathuranga/
 - `cd /tmp/chathuranga`
- Since we executed the getJsons.sh in the /opt/tools, a folder with the name we entered earlier will be created at location /tmp/chathuranga.
- Go to the folder which was created and check whether there are any Json files.
 - `cd $FILENAME$`
- If there are, then copy the entire folder to the app server using the below command
 - `scp -r /tmp/chathuranga/$FILENAME$ root@172.16.11.36:/tmp/`

Step 2: Running CDR Extractor tool in App Server

Freeswtich Server IP:	172.16.11.67 (Port: 65)
Username:	root
Password:	Duo\$@2016

Go to App Server (172.16.11.36) by SSH from 172.16.11.67

Command: `ssh 172.16.11.36`

Username:	root
Password:	Duo\$@2016

Note: It's better to run the CDR Extractor and CDR Migration tools inside a screen. If the connection gets interrupted, the execution of the tools will not be interrupted.

Command to open a screen: `screen -S $SCREEN_NAME$`

`$SCREEN_NAME$` can be any name

Part I

- Go to `/usr/src/CDR-Extractor`
 - `cd /usr/src/CDR-Extractor`
- Run the CDR-Extractor.go
 - `go run CDR-Extractor.go`
- Enter the relevant details
 - *Enter company id*
 - *Enter tenant id*
 - *Enter the location of the folder (Eg: `/tmp/$FILENAME$/`)*

Step 3: Running CDR Migration tool in App Server

Part I

- Go to `/opt/Tools/DVP-MigrationTool/config`
 - `cd /opt/Tools/DVP-MigrationTool/config`
- Open the default.js file
 - `vi default.js`
- Edit the start date, end date and company id as needed
- Go back to `/opt/Tools/DVP-MigrationTool`
 - `cd /opt/Tools/DVP-MigrationTool`
- Run the app.js file
 - `node app.js`
